

Psychology Externship Training Program

Neuropsychology Rotation

2025-2026

Children's Hospital Colorado/University of Colorado School of Medicine offers a psychology externship training program in Pediatric Neuropsychology. The training program is committed to the recruitment of culturally and ethnically diverse externs. We encourage inquiries and applications from all qualified individuals. Please see requirements below.

Number of Positions: 2 first year extern positions, 1-2 second year extern positions

Time Commitment: 20 hours per week for first year externs, 10-20 hours for second year externs

Location: Children's Hospital Colorado - Main Campus (Anschutz) and/or Network of Care sites

Dates: June 23, 2025 - June 19, 2026

*Please note: MANDATORY ORIENTATION is held during the first two weeks of the externship. Block your schedule accordingly, making arrangements with your academic program and personal calendar.

Requirements:

- be enrolled in at least the 3rd year of an APA accredited Doctoral Program in Clinical, Counseling, Health, or School Psychology (at least 2nd year at the time of application)
- have completed coursework in cognitive assessment, personality/psychosocial assessment, and clinical neuropsychological assessment
- have experience with child and/or adolescent assessment
- have proof of malpractice coverage: must be provided by the extern's training institution or by the extern prior to the start date
- be available to start the externship on June 23, 2025 and the following two weeks for MANDATORY ORIENTATION
- complete and sign the attestation of professional conduct form

**Those applicants selected for externship will be subject to drug screening and criminal background checks (there may be associated costs so speak with your program as these fees are not covered by CHCO). Unacceptable results on the criminal background check or drug screening will result in dismissal from the program.

APPLICATION PROCEDURES

A completed application consists of the following materials:

1. Cover Letter
2. Curriculum Vitae
3. 2 letters of recommendation
4. Attestation of Professional Conduct
5. Extern Application Face sheet

Emailed by February 1, 2025 at 5pm to the following:

1. CHCO Psychology Training Program email
Email: CHCOPsychTrainingprogram@childrenscolorado.org
2. If you have questions, please email Tamara Zangrilli, Operations Coordinator
Email: Tamara.Zangrilli@childrenscolorado.org

Recruitment Timeline

February 1, 2025 @ 5pm:

February 7 - 21, 2025:

February 24 - March 1, 2025:

Application deadline (early submissions encouraged!)

Interviews scheduled (early interviews available with early, complete submissions)

Positions offered, prompt confirmation of acceptance/declination requested

13123 E 16th Ave, Aurora, CO 80045
720-777-1234 | childrenscolorado.org

DUTIES OF PSYCHOLOGY TRAINEES

Neuropsychology externs will provide direct clinical care to children, adolescents, and families under the supervision of pediatric neuropsychologists. The extern will work in the Division of Neurology for 6 months and the Department of Rehabilitation Medicine for 6 months. For both rotations, first year externs are expected to work part-time at 20 hours per week in order to gain both a range and depth of experiences. Second year externs range from 10-20 hours per week depending on trainee goals and graduate school requirements. Expectations include conducting 1-2 outpatient neuropsychological evaluations per week, including reviewing electronic medical records, test selection, clinical interviewing, administration and scoring of measures, integration of testing results, feedback, and report writing. Trainees may also have exposure to telehealth sessions involving intake, assessment, or provision of feedback. Opportunities to see patients in interdisciplinary consultation clinics or outpatient clinical evaluations using an umbrella supervision model involving a neuropsychology post-doctoral fellow or intern and neuropsychologist may also be available. These duties are subject to change to meet the needs of the department. Externs complete necessary initial clinical documentation within 7 days of contact, with final drafts of reports due as specified by the supervisor. Externs must complete all hospital required background / training activities.

Externs will attend didactic seminars through Neurology and Rehabilitation Medicine. The Neuropsychology extern will also be encouraged to attend didactic seminars through the Psychiatry and Behavioral Sciences Department if their schedule allows. Externs also have the opportunity to attend epilepsy surgery conference.

Referral diagnoses served

1. Neurology

- a. Genetic disorders (Neurofibromatosis Type 1; 22q11.2 deletion syndrome; Turner syndrome; Tuberous Sclerosis; sex chromosome aneuploidy)
- b. Metabolic disorders (PKU, urea cycle disorders)
- c. Epilepsy and seizure disorders
- d. Childhood stroke
- e. Hypoxic-ischemic encephalopathy
- f. Oncologic or hematologic diagnosis diagnoses (brain tumor, leukemia, bone marrow transplant, sickle cell disease, Schwachman-Diamond syndrome)
- g. Neuroimmunological disorders (multiple sclerosis, neuromyelitis optica)
- h. Abnormal brain MRI findings deemed to be of clinical significance (e.g., hypoxic-ischemic encephalopathy, schizencephaly, hydrocephalus)
- i. Craniofacial disorders (Speech-specific concerns can be seen by Audiology, Speech and Language Department)
- j. Movement disorders with known diagnosis (e.g., abnormal involuntary movements, ataxia)
- k. Cardiology including congenital heart disease
- l. Solid organ transplant with relevant impact or treatment (candidate or post-transplant)
- m. Neuromuscular disorders
- n. Multicultural/bilingual

2. Rehabilitation:

- a. Concussion/mild traumatic brain injury
- b. Moderate to severe traumatic brain injury
- c. Anoxic/Hypoxic brain injury
- d. Spina bifida/Myelomeningocele
- e. Hydrocephalus
- f. Cerebral palsy
- g. Central nervous system infections (encephalitis, meningitis)
- h. Perinatal stroke
- i. Duchenne muscular dystrophy
- j. International adoption
- k. Prematurity (<= 35 weeks)
- l. Low birth weight (<= 5 lb 9 oz)
- m. HIV
- n. Neuromuscular disorders
- o. Multicultural/bilingual

Services provided: This externship placement provides students with the opportunity to work in a regionally and nationally prominent pediatric health care facility affiliated with the University of Colorado at Denver Health Sciences Center (UCDHSC) and the Divisions of Neurology and Rehabilitation Medicine. Field placement students (Externs) are supervised by pediatric neuropsychologists to conduct outpatient neuropsychological evaluations.

Type of clients served on this externship: Children and adolescents, ages ranging from birth to early adulthood, and their families served in Children's Hospital Colorado Departments of Neurology and Rehabilitation Medicine. Clients are representative of the Denver Metropolitan Area in terms of race and ethnicity.

There may be opportunities to complete bilingual (English/Spanish) evaluations based on the trainee's experience and level of Spanish proficiency as well as the availability of the bilingual supervisors. Please specify if you are interested in pursuing this specific area of training in your cover letter.

Supervision

The goal of supervision is to support the extern during exposure to new patient populations and assessment tools, as well as guidance in interpretation/integration of neuropsychological data and report writing. Outpatient neuropsychological evaluations have an in-vivo supervision component in which the trainee works closely with the supervisor on the day of the evaluation. The extern will participate in at least 1 hour of individual supervision per week with his/her neuropsychology supervisor. Additional supervision and consultation will be provided as needed.

Supervised by: Pediatric neuropsychologists within the Divisions of Neurology and Rehabilitation Medicine

Neuropsychology Supervision format: Individual, Small Group

Ratio of hours (supervision to clinical hours): 1:4

Number of Neuropsychology trainees: 3 postdoctoral fellows, 1 psychology intern, 2-4 field placement extern

Number of hours/week externs work: 20 for first year extern, 10-20 for second year extern

Pay: None

Division of Neurology Faculty

Gretchen M. Berrios-Siervo, Psy.D., ABPP/CN is an Associate Professor of Pediatrics and Neurology at the University of Colorado Anschutz Medical Campus and serves as a Pediatric Neuropsychologist in the Division of Neurology at Children's Hospital Colorado. Dr. Berrios-Siervo is bilingual and has interests in the assessment of Spanish speaking children and adolescents. She is also the Director of Multicultural and Bilingual Training and has interests in assessment and training of diverse populations. Additional areas of clinical interest include epilepsy and epilepsy surgery (pre/post evaluations). She runs the New Onset Epilepsy (NOE) Clinic and provides consultation to the Tuberous Sclerosis Clinic in Neurology. Dr. Berrios-Siervo received her bachelor's degree (psychology) from Miami University and her doctoral degree from Carlos Albizu University in Clinical Psychology. She completed an internship in pediatric psychology/neuropsychology at Miami Children's Hospital and a two-year fellowship in pediatric neuropsychology at Dartmouth-Hitchcock Medical Center. Dr. Berrios-Siervo is board certified in Clinical Neuropsychology and Pediatric Clinical Neuropsychology. gretchen.berrios-siervo@childrenscolorado.org; <https://profiles.ucdenver.edu/display/228865>

Yasmine R. Botto, Ph.D. is an Assistant Professor of Pediatrics and Neurology at the University of Colorado Anschutz Medical Campus, and a Pediatric Neuropsychologist in the Division of Neurology at Children's Hospital Colorado. As a generalist, she is interested in understanding neurocognitive profiles of children with various medical conditions and being both accessible and compassionate when working with families. She knows both French and American Sign Language and is committed to conducting culturally sensitive evaluations. Dr. Botto received her bachelor's degree in Psychology from the University of Texas at Austin, where she also completed her doctoral degree. She completed both her predoctoral internship and two-year fellowship at Children's Hospital Colorado/the University of Colorado School of Medicine.

Christa Hutaff-Lee, Ph.D., ABPP/CN is an Associate Professor of Pediatrics and Neurology at the University of Colorado Anschutz Medical Campus and a Pediatric Neuropsychologist in the Division of Neurology at Children's Hospital Colorado. Dr. Hutaff-Lee is the Training Director for the Neuropsychology Program in the Neurology Department, overseeing the Neuropsychology Rotation for the Internship and Externship Programs, as well as the APPCN-approved fellowship program in Pediatric Neuropsychology. She currently participates in a variety of inter-disciplinary clinics including the Neuroimmunology Clinic for Children for patients with neuroimmunological disorders and the Turner Syndrome clinic at Children's Hospital Colorado. She is interested in the neurocognitive profiles of children with pediatric demyelinating and autoimmune disorders, pediatric brain tumors, cancer, and hematological disorders, and genetic disorders. She is particularly interested in educational and therapeutic interventions for children with neurological and genetic disorders, as well as potential factors affecting performance during neuropsychological evaluations. Dr. Hutaff-Lee received her bachelor's degree (psychology) from the University of Denver and completed her doctoral degree at the University of Northern Colorado. She completed a predoctoral internship in neuropsychology at Children's Hospital Colorado and a

two-year fellowship in pediatric neuropsychology at Texas Children's Hospital/Baylor College of Medicine. Dr. Hutaff-Lee became board certified in clinical neuropsychology through the American Board of Professional Psychology in 2018. Christa.hutaff-lee@childrenscolorado.org; <https://profiles.ucdenver.edu/display/228235>

Jennifer Janusz, Psy.D., ABPP/CN is a Professor of Pediatrics at the University of Colorado Anschutz Medical Campus and serves as a Pediatric Neuropsychologist in the Division of Neurology at Children's Hospital Colorado. Her clinical interests include the neurocognitive profile of children with genetic disorders, and she works closely with the Neurofibromatosis Program, the 22q11.2 Deletion Syndrome Clinic, and the eXtraordinary Kids Clinic. Dr. Janusz received her bachelor's degree (psychology) from American University and her doctoral degree from the Virginia Consortium Program in Clinical Psychology. She completed an internship in pediatric psychology/neuropsychology at Children's Hospital of Michigan and a two-year fellowship in pediatric neuropsychology at Nationwide Children's Hospital/ Ohio State University. Dr. Janusz became board certified in clinical neuropsychology through the American Board of Professional Psychology in 2004. jennifer.janusz@childrenscolorado.org; <https://profiles.ucdenver.edu/display/230240>

Arianna Martin, Psy.D. is an Assistant Professor of Pediatrics and Neurology at the University of Colorado Anschutz Medical Campus and serves as a Pediatric Neuropsychologist in the Division of Neurology at Children's Hospital Colorado. Dr. Martin is bilingual and has interests in the assessment of Spanish speaking children and adolescents. Her clinical interests include children and adolescents with various neurological and medical conditions including focal and generalized epilepsy, pediatric cancers, PKU, sickle cell disease, and craniofacial disorders. Her research interests involve examining cognitive factors (e.g., executive function) among pediatric populations and its impact on overall behavioral, academic and social outcomes. Dr. Martin received her bachelor's degree (Psychology and Computer Science) from Claremont McKenna College. She received her doctoral degree in Clinical Psychology from the PGSP-Stanford Psy.D. Consortium. She completed her internship in pediatric psychology at Children's Hospital of Orange County and a two-year fellowship in pediatric neuropsychology at Children's National Health System. arianna.martin@childrenscolorado.org <https://profiles.ucdenver.edu/display/13108677>

Andrea S. Miele, Ph.D. ABPP/CN is an Assistant Professor of Pediatrics at the University of Colorado Anschutz Medical Campus and serves as a Pediatric Neuropsychologist in the Division of Neurology at Children's Hospital Colorado. Dr. Miele has primary clinical interests in rare genetic disorders, and she specializes in working with children with neuromuscular diseases as well as developmental and epileptic encephalopathies. She also devotes a portion of her time following children with metabolic disorders, neurocutaneous disorders, and those who are preparing for, or who have already undergone, bone marrow transplant for hematology-oncology disease. Her research interests include neuropsychological functioning in children with the neuromuscular disease SMA (and especially Type 1), Batten Disease, the 8p and Ring14 Syndromes, and the STXBP1- and SLC6A1-related disorders. Dr. Miele received her bachelor's degree (psychology with a biopsychology concentration) from the College of the Holy Cross and her doctoral degree from the University at Albany, State University of New York. She completed an internship in combined child and adult neuropsychology at Long Island Jewish Medical Center and a two-year fellowship in combined pediatric and adult neuropsychology at Brown University. Dr. Miele became board certified in clinical neuropsychology through the American Board of Professional Psychology in 2022. Andrea.miele@childrenscolorado.org; <https://profiles.ucdenver.edu/display/11764087>

Ashley Nguyen-Martinez, PsyD, is an Assistant Professor of Pediatrics and Neurology at the University of Colorado Anschutz Medical Campus and a Pediatric Neuropsychologist in the Division of Neurology at Children's Hospital Colorado. While a generalist by training, Dr. Nguyen-Martinez is passionate about working with patients diagnosed with epilepsy and other seizure disorders. She is a part of the epilepsy team at CHCO, where she conducts pre- and post-surgical neuropsychological evaluations, Wada testing, brain mapping procedures, and provides consultations in the Epilepsy Surgery Clinic. She has held several leadership positions across larger neuropsychology organizations, where she leverages her positions to advocate for patients' and neuropsychologists' needs. Her current research primarily focuses on topics related to health equity, culturally sensitive care, and the tiered neuropsychological service model. Dr. Nguyen-Martinez received her bachelor's degree from the University of California San Diego and completed her master's and doctoral degrees at Pepperdine University. She completed a predoctoral internship in pediatric neuropsychology at the University of Minnesota Medical School and a two-year fellowship in pediatric neuropsychology at Children's Hospital Colorado/ University of Colorado School of Medicine. Ashley.nguyen-martinez@childrenscolorado.org <https://som.cuanschutz.edu/Profiles/Faculty/Profile/37420>

Elise Turner, Ph.D. is an Assistant Professor of Pediatrics at the University of Colorado Anschutz Medical Campus and Pediatric Neuropsychologist in the Division of Neurology at Children's Hospital Colorado. Dr. Turner's clinical interests include working with youth with complex medical conditions, including pediatric oncology, stroke, and solid organ transplantation. She also has interests in quality improvement work, including implementation of preventative and tiered neuropsychological services. She completed her graduate training at the University of Florida. Her internship was completed at Oregon Health & Science University, and her fellowship was completed at Children's Hospital Colorado/University of Colorado School of Medicine. Elise.turner@childrenscolorado.org <https://profiles.ucdenver.edu/display/27967696>

Greta N. Wilkening, Psy.D, M.Ed, ABPP/CN is a Professor of Pediatrics at the University of Colorado Anschutz Medical Campus. In addition to directing the Pediatric Neuropsychology service (within Neurology), she developed and directs the Neurodevelopmental Research Core. Her primary clinical interests are the evaluation and follow-up of children with epilepsy and brain neoplasms. She is the lead neuropsychologist for the Urea Cycle Disorder Consortium Longitudinal Study. She is board certified in Clinical

Kelly Wolfe, Ph.D., ABPP/CN is an Associate Professor of Pediatrics at the University of Colorado Anschutz Medical Campus, the Clinical Director of the Neuropsychology Program in the CHCO Neuroscience Institute, and the Director of the Cardiac Neurodevelopmental Program in the CHCO Heart Institute. She is board certified in clinical neuropsychology and subspecialty board certified in pediatric neuropsychology through the American Board of Clinical Neuropsychology. Dr. Wolfe collaborates with multidisciplinary teams on outpatient and inpatient clinical, research, and quality improvement initiatives to better understand and improve neurodevelopmental outcomes in children and young adults with cardiac disease. Her research has included examining predictors of neuropsychological outcomes in single ventricle heart disease and heart transplantation. Dr. Wolfe also serves on the editorial board of the Journal of Pediatric Neuropsychology and is a Co-Vice Chair of the Cardiac Neurodevelopmental Outcome Collaborative. Kelly.Wolfe@chidrengcolorado.org <https://som.ucdenver.edu/Profiles/Faculty/Profile/23697>

Department of Rehabilitation Medicine Faculty

Alison M. Colbert, Ph.D., ABPP/CN is an Assistant Professor at the University of Colorado and is a Pediatric Neuropsychologist and Rehabilitation Psychologist in the Department of Rehabilitation Medicine at the Children's Hospital Colorado. She works as a neuropsychologist and rehabilitation psychologist on the inpatient Neurotrauma/Rehabilitation unit and conducts outpatient neuropsychological evaluations. Her research interests focus on neurocognitive outcomes following central nervous system disruption, developmental or acquired. She is interested in identifying factors that predict risk and resilience, enhance diagnosis and treatment, and influence neurocognitive and psychological outcomes. Dr. Colbert received her bachelor's degrees (Psychology and Spanish) from Saint Francis University in Loretto, PA, and her master's degree in Clinical Health Psychology from Texas State University in San Marcos, TX. She earned her doctoral degree in Clinical Psychology at Eastern Michigan University in Ypsilanti, MI. Dr. Colbert completed an internship in Rehabilitation Psychology, as well as a two-year fellowship in Pediatric Neuropsychology at Children's Hospital Colorado. alison.colbert@chidrengcolorado.org <https://profiles.ucdenver.edu/display/21150875>

Amy Connery, Psy.D., ABPP/CN is an Associate Professor of Physical Medicine and Rehabilitation at the University of Colorado Anschutz Medical Campus. She is a pediatric neuropsychologist in the Department of Rehabilitation Medicine at Children's Hospital Colorado. She provides clinical services in Concussion Clinic, International Adoption Clinic (IAC), and the Non-Accidental Brain Injury Care Clinic (NABICC). Her research interests include the effects of early adversity and neurologic insult on developmental outcomes. She conducts bilingual (English/Spanish) evaluations. Dr. Connery received her bachelor's degree in psychology from Loyola University of Chicago and her doctoral degree from The Wright Institute in Berkeley, California. She completed an internship at the University of California, San Francisco, a one year postdoctoral fellowship at Children's Hospital and Research Center in Oakland and a two year fellowship in pediatric neuropsychology at the Neurodevelopment Center in Salt Lake City, Utah and the Idaho Elks Rehabilitation Hospital in Boise, Idaho. Dr. Connery became board certified in clinical neuropsychology through the American Board of Professional Psychology in 2009. She received the pediatric subspecialty designation in 2014. amy.connery@chidrengcolorado.org <https://profiles.ucdenver.edu/display/21098427>

Stephanie Hitti, Ph.D. is an early career Assistant Professor at the University of Colorado and is a Pediatric Neuropsychologist in the Department of Rehabilitation Medicine at the Children's Hospital Colorado. She provides clinical services in the Concussion Clinic and conducts bilingual (Spanish/English) outpatient neuropsychological evaluations. She grew up in Venezuela and England and is very interested in multicultural neuropsychology. Her research interests focus on non-accidental traumatic brain injuries, barriers to neuropsychological assessment, and the translation/interpretation of neuropsychological tests. Dr. Hitti received her bachelor's degrees (Psychology and Child Development) from Vanderbilt University in Nashville, TN and then went on to complete her master's and doctoral degrees in Child Clinical Psychology at Virginia Commonwealth University in Richmond, VA. Dr. Hitti completed an internship in Neurorehabilitation, as well as a two-year fellowship in Pediatric Neuropsychology at Children's Hospital Colorado. Stephanie.hitti@chidrengcolorado.org <https://som.cuanschutz.edu/Profiles/Faculty/Profile/37421>

Michael Kirkwood, Ph.D., ABPP/CN is a Professor of Physical Medicine and Rehabilitation at the University of Colorado Anschutz Medical Campus. He is the Director of the Rehabilitation Psychology/ Neuropsychology Program, as well as the Co-Director of the Children's Hospital Colorado Concussion Program. His clinical and research interests focus on acquired brain injury in children, particularly mild TBI, as well as the value of validity testing in pediatric assessment. He also has a primary interest in promoting and supporting board certification in clinical neuropsychology. Dr. Kirkwood received his bachelor's degree from the University of Notre Dame and doctoral degree from DePaul University. He completed an internship in pediatric psychology/neuropsychology at Nationwide Children's Hospital / The Ohio State University and a two-year fellowship in pediatric neuropsychology at Boston Children's Hospital / Harvard Medical School. michael.kirkwood@chidrengcolorado.org <https://profiles.ucdenver.edu/display/21098422>

Paige E. Naylor, Ph.D., is an Assistant Professor of Physical Medicine and Rehabilitation at the University of Colorado Anschutz Medical Campus. She is a pediatric neuropsychologist in the Department of Rehabilitation Medicine at Children's Hospital Colorado. Clinically, Dr. Naylor works as a generalist within the department, including in the Concussion Program. She also has an interest in the identification of neurodevelopmental disorders in rehabilitation patients. In terms of research, Dr. Naylor is interested in health equity and quality improvement work, including identifying barriers to patients accessing care. She received her bachelor's degree from

Trinity University in San Antonio and her doctoral degree from Palo Alto University. Dr. Naylor completed her internship at Duke University School of Medicine and a two-year pediatric neuropsychology fellowship at the Medical College of Wisconsin/Children's Wisconsin. Paige.naylor@childrenscolorado.org

Robin L. Peterson, Ph.D., ABPP/CN is an Associate Professor of Physical Medicine and Rehabilitation at the University of Colorado Anschutz Medical Campus. She is a pediatric neuropsychologist in the Department of Rehabilitation Medicine at Children's Hospital Colorado. Her clinical and research interests include understanding developmental outcomes in children with language/learning disorders, spina bifida, and acquired brain injuries. She is the training director for neuropsychology in rehabilitation. Dr. Peterson received her bachelor's degree in psychology and biology from Harvard University. She completed a master's in Education and worked as an elementary school teacher before pursuing doctoral training in clinical child psychology. She completed her PhD through University of Denver, her internship through Children's Hospital Colorado, and a two-year postdoctoral fellowship in Pediatric Neuropsychology through University of Denver and Children's Hospital Colorado/University of Colorado Denver School of Medicine. Dr. Peterson became board certified in clinical neuropsychology through the American Board of Professional Psychology in 2015. She received the pediatric subspecialty designation in 2018. Robin.peterson@childrenscolorado.org; <https://profiles.ucdenver.edu/display/21098429>

Christine Petranovich, Ph.D., ABPP/CN is an Assistant Professor at the University of Colorado and a clinical neuropsychologist in the Department of Rehabilitation at Children's Hospital Colorado. Clinically, Dr. Petranovich is primarily interested in acute and long-term neuropsychological assessment of children and adolescents with moderate to severe traumatic brain injury. From a research perspective, she is interested in identifying predictors of cognitive functioning, social competence, and behavior after traumatic brain injury. Dr. Petranovich is also interested in understanding protective and modifiable risk factors in the transition to adulthood for individuals with a history of rehabilitation-specific medical conditions. She earned a bachelor's degree in psychology and biological anthropology from the University of New Mexico and a doctoral degree in clinical psychology from the University of Cincinnati. Internship and post-doctoral fellowship in pediatric neuropsychology were completed at the University of New Mexico Health Sciences Center. christine.petranovich@childrenscolorado.org <https://profiles.ucdenver.edu/display/21098450>
