Burn Center

# BURN PREVENTION STARTS AT HOME

Most pediatric burns are caused by common household hazards.

## GLASS-FRONTED GAS FIREPLACES

**Fireplace burns** have increased by **25%** from 2014 to 2015.

The **glass barrier** of a gas fireplace door can heat up to more than **200° F** in **6 minutes**.

## HOT LIQUIDS

When tap water reaches **140° F**, it can cause a **third-degree burn** in just **five seconds**.

**50%**  
of **scalding injuries** are from **food and drinks**.

## HOUSEHOLD OBJECTS

**Children** explore with their **hands**. **Almost 50%** of burns we see at Children's Colorado are **hand burns**.

The Burn Center at Children's Hospital Colorado is the only program in the Rocky Mountain region dedicated to treating and preventing pediatric burns. Our program was established in 1974, and we care for all aspects of burn or skin injury in babies, kids, and teens, including rehabilitation and scar reconstruction.

Our expert team works together to evaluate, manage, and heal all varieties of burn-induced wounds and scars. We're here to help you and your family through what can be a difficult experience.
